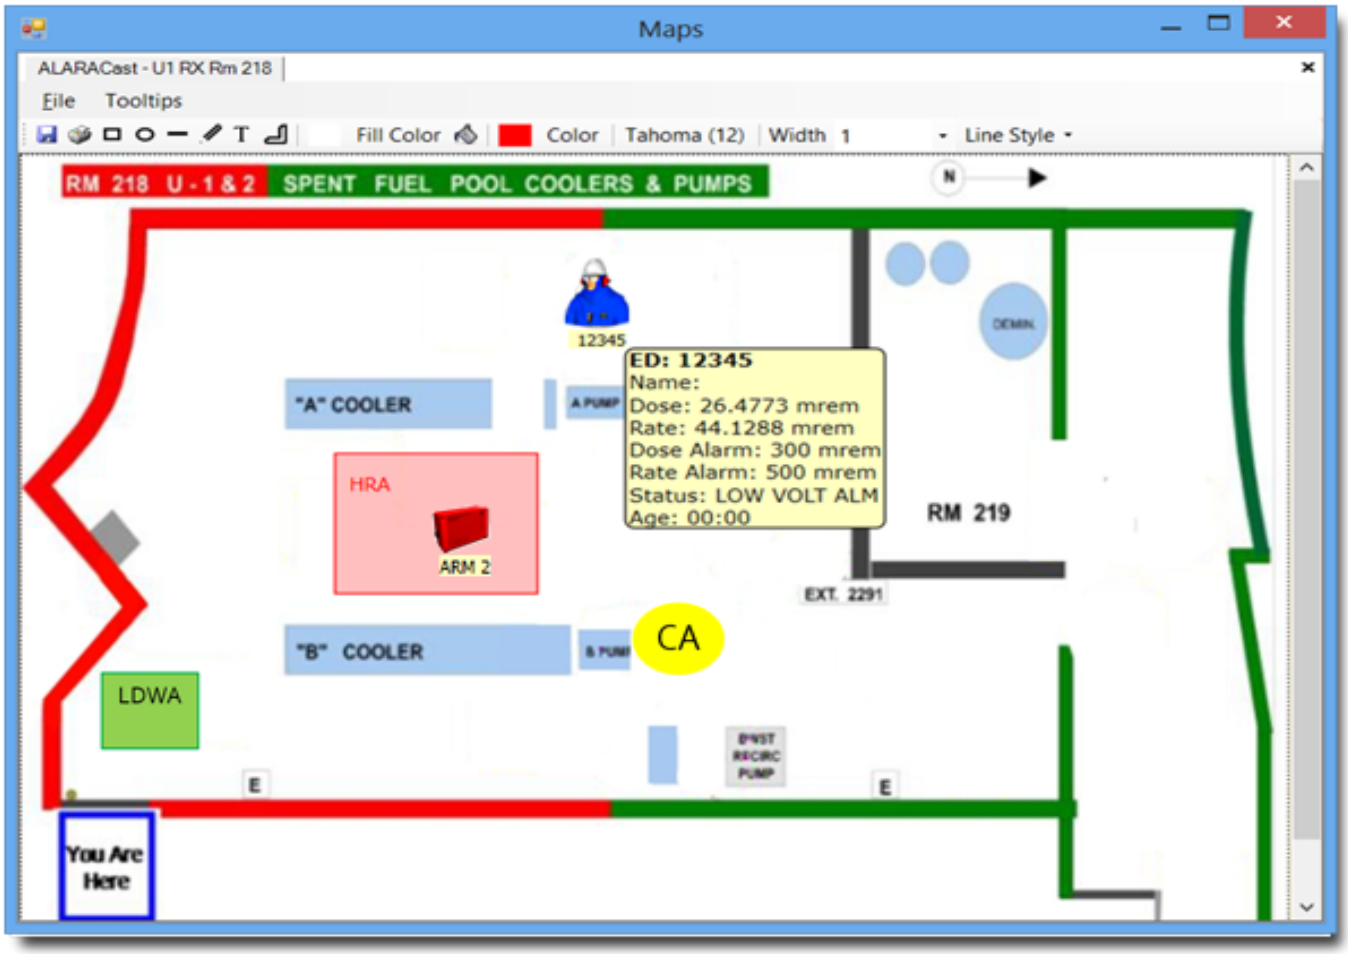
I.I.S. ALARACast

ALARACast is the new telemetry software from I.I.S. with many influences and familiar functionality of RADS telemetry, is full of great new features and an up-to-date look. ALARACast is the most advanced yet user friendly telemetry software package available today.



GUI Map Interface:

Drag and drop ED's, ARM's, and CAM's to display live time data on your map and gives you Status Board Info.

Graphic interface tools to customize the map with important environmental information.

Tooltips can show your instrument data always or keep hidden and display with a mouse over.
