Genetec Security Center

Simply Powerful. The Security Center is a unified security platform. It seamlessly blends Genetec's IP license plate recognition, video surveillance, and access control systems into one innovative yet simple solution. With an innovative interface, the Security center facilitates the seamless management of multiple security and safety systems, regardless of installation size. At its core, the Security Center is packed with powerful features. This combination of power and simplicity makes the Security Center one of the most advanced and cost-effective unified security solutions on the market.

Genetec Security Center

Key Benefits

Simple and Easy-to-Use

Simplify installation through a single configuration client to configure all your cameras and doors

Benefit from advanced entity search functions, hierarchical views and various display tile patterns

Use context-sensitive widgets for cameras, doors, zones, alarms and PTZ camera controls

Flexible and Extremely Scalable

Monitor large distributed systems spanning multiple sites from a central location

Grow your system one camera or door at a time and at your own pace

Install thousands of cameras, doors, client workstations, and other system components

Centrally manage thousands of cardholders and credentials and synchronize them to remote sites

Use mature software development kits for powerful 3rd party system integration

Reliable and Secure

Secure client-server communicator with a sophisticated encryption mechanism

Integrate with Microsoft's Active Directory to authenticate users using their windows credentials

Use advanced password-protected operator login and track changes through audit reports

Assign rights and privileges to different sites for secure multi-tenant and multi-site functionality

Ensure high system availability through standard and advanced failover functionality

Highly Cost-Efficient

Leverage existing infrastructure and hardware investments with non-proprietary solution

Minimize the number of installed user workstations with unified security

Reduce training costs through consistent operator workflows across multiple security applications

Enable a single license for license plate recognition, video and access control systems.

Network Architecture

Leverage the benefits of your IP network one component at a time. The Security Center provides end-to-end IP connectivity to all major system components.

Genetec Security Center

- Monitoring and management of video system events and alarms
- Superior video viewing experience
- Flexible video recording management
- Advanced bandwidth management
- Generation of multiple video searches and reports
- PTZ camera control including PTZ-in-tile controls and digital zoom
- Manual and automated video bookmarking
- Monitoring and management of access events and alarms
- Verification of cardholder picture IDs against live or recorded video
- Generation of access control configuration and activity reports
- Advanced door control (lock/unlock override schedules, enable door maintenance)

Innovative Features

Open-Architecture Platform. Choose from a long list of major 3rd party hardware and software vendors or leverage existing investments. Get a non-proprietary system and the freedom of choice thanks to the Security center's innate open-architecture.

Scalable Multi-Site Monitoring. Unify multiple independent video and access control systems under a single virtual system with the Federation feature. Federate hundreds or thousands of remote systems for city-wide surveillance and managed central monitoring services.

Centralized Alarm Management. Avoid the traditional approach of separating alarm monitoring for different systems. Configure, monitor and respond to alarms for your entire security environment. View access control and intrusion alarms with associated video.

Active Directory Integration. Centralize management and synchronization of Windows user accounts with the Security Center's user and cardholder and cardholder accounts. Provide single capabilities and ensure newly created cardholders automatically inherit physical building access rights without further data entry.

Multi-Tenant Functionality. Segment operations per tenant or managed services account, and assign privileges per site with the Partitioning feature. Give individual site managers or tenants their own sites to manage in parallel to any centralized monitoring.

Consolidated Reporting. Video specific reports: date/time, bookmark, motion, and more.

Get exactly what you need from the Security Center

- Standalone IP video surveillance*
- Standalone IP access control platform*
- Federated IP access control and/or IP video surveillance systems

* If required at a later date, other system components can be added through a simple licensing change, ensuring your initial purchase of a standalone system can support additional functionality.

Unified Security Interface

The Security Center's user interface blends compelling design with an innovative task-based approach. This unified security interface offers you a unique exciting experience that is truly unlike any other. Get the most cutting-edge user interface in today's security industry :

- Uncluttered interface for video and event monitoring, reporting and alarm management
- One interface for configuring and managing your LPR units, video cameras, doors and cardholders
- Single click functionality for common monitoring and reporting tasks
- Dynamic interface that adjusts in real time to what the operator is doing
- Home menu that groups tasks by operation, investigation, administration, and maintenance
- Display tile menus, widgets, and quick commands
- Numerous user-selectable customization options
